INSTITUTE VISION AND MISSION

Vision

“To provide value based technical education so as to meet the needs of industry and society”.

Mission

M₁ Imparting technical knowledge and skills through effective implementation of teaching and learning.

M₂ Strengthening interaction between industry and institute to fulfill the requirements of industries.

M₃ To inculcate the professional and ethical values for social and environmental concern.

Principal's Message

“ Education is not the learning of facts, but the training of mind and soul”

- Albert Einstein

Dr. Ganesh B. Dongre
(Principal)

Dear students and parents,

I am extremely sanguine and profoundly privileged to head this great institution while celebrating 10 years of successful journey.

First of all I extend my warm greetings and felicitation to all inmates to college through ‘Technovision-2020’ and feel immensely happy to salute the creativity and aesthetic sensibilities of the young minds.

The techno vision-2020 chronicles the vast spectrum of scholastic and non-scholastic activities carried out at the college for all round personality development of young learners. It also exposes its achievement in various spheres and thus exhibits the endeavor made by the institute and faculty for attainment of objectives and social goal. It is an ideal platform for the credits to express the experiences, views and literary skills besides developing creativity amongst them.

I congratulate the staff and students of all the faculties who used various mediums of expression to present their ideas for bringing Techovision-2020. I appreciate every student who shared joy of participation in co-curricular and extra-curricular activities with their commitment to curriculum. I wish all the best!!

DEPARTMENT VISION

“TO DEVELOP COMPETENT ELECTRICAL ENGINEER WITH HIGH HANDS-ON SKILL AND MORAL VALUES TO FACE THE CHALLENGES OF MODERN SOCIETY AND INDUSTRY”

DEPARTMENT MISSION`

- To impart the technical knowledge of the discipline among the students with reference to multidisciplinary approach.
- To provide platform to the student through strong linkage with industry to develop their professional skill.
- To establish effective awareness among the students for society and environment responsibilities
- To prepare students having high ethical standards and leadership qualities and enthusiasm for lifelong learning

ELECTRICAL ENGINEERING DEPARTMENT

PROF.C.V.RAHANE

HOD EE DEPT

Electrical Engineering is a professional engineering discipline that deals with the study and application of electricity, electronics and electromagnetism. The field first became an identifiable occupation in the late nineteenth century with the commercialization of the electric telegraph and electrical power supply.

The field now covers a range of sub-disciplines including those that deal with power, optoelectronics, digital electronics, analog electronics, computer science, artificial intelligence, control systems, electronics, signal processing and telecommunications.

The term electrical engineering may or may not encompass electronic engineering. Where a distinction is made, electrical engineering is considered to deal with the problems associated with large-scale electrical systems such as power transmission and motor control, whereas electronic engineering deals with the study of small-scale electronic systems including computers and integrated circuits. Another way of looking at the distinction is that electrical engineers are usually concerned with using electricity to transmit energy, while electronics engineers are concerned with using electricity to transmit information

Electrical Engineering implies electricity, which has flowed into every aspect of our lives. Electricity supplies power to run appliances, heavy machinery, and lights. Electricity also encompasses communications such as the telephone, radio, and television and other consumer electronic devices.

Objectives of Paper Presentation

The objective of the competition is to provide the platform to students to present their skills and help them to build confidence and enhance their knowledge in the field and aware them about new technologies.

Call for Papers

1. Best Practices to reduce maintenance at Electrical substation
2. New techniques for Electrical Energy conservation
3. Scope of PLC and SCADA in Automation
4. Recent technology to reduce the Electricity theft
5. Future of E-vehicles
6. Efficient Motors
7. Artificial Intelligence at Electrical Substation
8. Overhead and underground Electrical Installation

Electrical Engineering Group

Vision

"To develop competent Electrical Engineers with hands on skills and moral values to face the challenges of society and industry."

Mission

M1: To impart the technical knowledge of the discipline among the students with reference to multidisciplinary approach.

M2: To develop platform to the student's through strong linkage with industry for the development of professional skills.

M3: To create effective awareness among the students regarding social and environment responsibilities.
